Low Cost & High Efficiency Irrigation Systems

IRRIFORCE CATALOG  
2022

Irriforce is an irrigation machine designed for Energy Efficiency. Its cost in terms of both use and investment is lower than those of its rivals. We may call Irriforces as traveling rain gun. Thanks to water turbine and steel rope in it, it irrigates your field by dragging itself.

Irriforces can be used in anywhere irrigation is required; you may conveniently use it for irrigation of any agricultural products, any sport sports grounds, lawn irrigation, meadow irrigation and range improvement. Most important factor making such small dimensions of Irriforces is that it is equipped with soft hose. Instead of hard hose of the drum irrigation machines, soft hose is used here. As at is, it only pulls its special hose equivalent to  $\frac{1}{4}$  of its own weight, instead of dragging tons of pipes in weight. And thus energy efficiency maximizes. Higher weight pulled would also affect service life of your machine. And storage and handling costs are also small.

There are different types that can irrigate up to 120 m – 140 m – 200 m -300 m and 400m in length; and we have also diesel and petrol fuelled versions that can work with waste water. You may contact with us for your irrigation requirements of 500 m at one time.

Now forget about hard hose drum irrigators in gigantic dimensions. Contact with us quickly to meet with our new generation irrigators; and you also contribute to energy efficiency for the world and to budget as well.

Irriforce es una máquina de riego que está diseñada para ofrecer Eficiencia Energética. Tanto el uso y el coste de inversión es mucho más bajo que sus competidores. Podemos decir que Irriforce es una pistola de riego autopropulsada. Gracias a la turbina de agua y la cuerda de acero, la máquina realiza el riego de manera autopropulsada.

Irriforce puede utilizarse en cualquier terreno donde se requiera riego como pueden ser el riego de los productos agrícolas, todo tipo de campos de deporte, riego de césped, riego de praderas y así como mejoramiento de los pastos. Irriforce posee unas dimensiones reducidas gracias a su manguera blanda. Dispone de una manguera blanda en lugar de manguera rígida que se utiliza en las máquinas de riego con tambor. Por lo tanto, en lugar de arrastrar en el campo tubos muy pesados, lleva una manguera especial equivalente a  $\frac{1}{4}$  de su propio peso solo. De esta manera, se maximiza la eficiencia energética. Dado que las cargas de mayor peso afectan a la vida útil de la máquina. Además, los costes de almacenamiento y transporte se reducen considerablemente.

Disponemos de diferentes tipos de modelos estándares con capacidades de riego de hasta 120 m – 140 m – 200 m -300 m y 400 m y así como modelos de diesel y gasolina que funcionan con aguas residuales. Para capacidades de riego de 500 por favor, póngase en contacto con nosotros.

Es hora de olvidarse de las máquinas de riego con tambores de grandes dimensiones. Para conocer las máquinas de riego de nueva generación, póngase en contacto con nosotros sin perder el tiempo. Además de ahorrar dinero, contribuirá a la eficiencia energética.

**GB** Water of minimum 3,5m<sup>3</sup>/hour should be delivered through hydrant at 4 bar. It operates with water of maximum 7 m<sup>3</sup>/hour. It has Atom22 irrigation gun on it. Maximum travelling distance is 120 meters. When the irrigation gun revolves one full turn, its effective irrigation distance is maximum 150 meters. Maximum irrigation width is 40 meters. It is mostly used for irrigation of sports grounds and small farms. Furthermore, it may also be used for parks, gardens and small agricultural fields. It may be used as washing gun to remove dust and dirt off the plants in the fields of alfalfa, vegetables, sunflower and olive trees where drip irrigation is used and as support irrigation when irrigation by dipping proves to be insufficient. Minimum recommended pumping power is 5.5 HP. Hose drum winding manually is on it.

**ESP** Requiere la salida de un mínimo de 3,5m<sup>3</sup>/hora de agua con 4 bares a través del hidrante. Funciona con un máximo de 7 m<sup>3</sup>/hora de agua. Dispone de una pistola de riego del modelo Atom22. La distancia de desplazamiento máxima es de 120 metros. Cuando la pistola de riego realiza un giro completo, la distancia de riego máxima es de 150 m. El ancho máximo de riego es de 40 m. Ideal para emplear en campos deportivos. Además se puede utilizar en parques, jardines y terrenos agrícolas pequeños. Puede utilizarse para eliminar el polvo y la suciedad de las cosechas con riego por goteo como alfalfa, hortalizas, girasol y olivo y como riego de apoyo cuando el riego por goteo es insuficiente. La potencia mínima de bomba recomendada es de 5.5 HP. Dispone de una manguera de bobinado manual sobre el tambor.

**GB** Water of minimum 20m<sup>3</sup>/hour should be delivered through hydrant at 5 bar. It operates with water of maximum 45m<sup>3</sup>/hour. It has JET50 irrigation gun on it. Maximum travelling distance is 300 meters. When the irrigation gun revolves one full turn, its effective irrigation distance is maximum 350 meters. Maximum irrigation width is 70 meters. It is mostly preferred by those who want to irrigate agricultural farms, meadows and pasture alfalfa. It may also be used for irrigation of any type of agricultural fields. It may also be used as washing gun to remove dust and dirt off the plants in the fields of alfalfa, vegetables, corn, sugar beet, sunflower and olive trees where drip irrigation is used and as support irrigation when irrigation by dipping proves to be insufficient. Minimum recommended pumping power is 10 HP. Pull-type hose drum manually winding also comes with the machine. Hose drum wound by tractor shaft may be obtained optionally.

**ESP** Requiere la salida de un mínimo de 20 m<sup>3</sup>/hora de agua con 5 bares a través del hidrante. Funciona con un máximo de 45 m<sup>3</sup>/hora de agua. Dispone de una pistola de riego del modelo JET50. La distancia de desplazamiento máxima es de 300 metros. Cuando la pistola de riego realiza un giro completo, la distancia de riego máxima es de 350 m. El ancho máximo de riego es de 60 m. Ideal para emplear en terrenos agrícolas, prados, alfalfas y pastos. Puede utilizarse en todo tipo de terrenos agrícolas. Puede utilizarse para eliminar el polvo y la suciedad de las cosechas con riego por goteo como alfalfa, hortalizas, maíz, remolacha azucarera, girasol y olivo y como riego de apoyo cuando el riego por goteo es insuficiente. La potencia mínima de bomba recomendada es de 10 HP. Dispone de una manguera de bobinado manual sobre el tambor. Opcionalmente, puede adquirirse el tambor de manguera enrollado mediante el eje del tractor.

# IRRIFORCE ULTRA

**GB** Water of minimum 28m<sup>3</sup>/hour should be delivered through hydrant at 5 bar. It operates with water of maximum 65m<sup>3</sup>/hour. It has JET65 irrigation gun on it. Maximum travelling distance is 500 meters. When the irrigation gun revolves one full turn, its effective irrigation distance is maximum 550 meters. Maximum irrigation width is 90 meters. It is mostly preferred by agricultural farmers and those who desire to irrigate meadows and pasture alfalfa and corn. It may be used for irrigation of any type of agricultural fields. It may also be used as washing gun to remove dust and dirt off the plants in the fields of alfalfa, vegetables, corn, sugar beet, sunflower and olive trees where drip irrigation is used and as support irrigation when irrigation by dipping proves to be insufficient. Minimum recommended pumping power is progressive 20 HP. Hose drum with planetary gear, allowing winding by means of tractor shaft is standard. Compressor used to discharge the water in the house can be obtained optionally.

**ESP** Requiere la salida de un mínimo de 28 m<sup>3</sup>/hora de agua con 5 bares a través del hidrante. Funciona con un máximo de 65 m<sup>3</sup>/hora de agua. Dispone de una pistola de riego del modelo JET65. La distancia de desplazamiento máxima es de 500 metros. Cuando la pistola de riego realiza un giro completo, la distancia de riego máxima es de 550 m. El ancho máximo de riego es de 90 m. Ideal para emplear en terrenos agrícolas, prados, alfalfas, pastos y maíz. Puede utilizarse en todo tipo de terrenos agrícolas. Puede utilizarse para eliminar el polvo y la suciedad de las cosechas con riego por goteo como alfalfa, hortalizas, maíz, remolacha azucarera, girasol y olivo y como riego de apoyo cuando el riego por goteo es insuficiente. La potencia mínima de bomba recomendada es de 20 HP. Dispone de tambor de manguera con engranaje planetario enrollado mediante el eje del tractor. Cuenta con un compresor de aire para descargar el agua que queda dentro de la manguera.
